When I am not coding or learning new skills, you can find me chasing my two wonderful daughters around, cooking in the kitchen, rooting for the Vikings, playing video games, and enjoying epic fantasy novels!

SKILLS

HTML, CSS, JavaScript, React.js, Node.js, SQL Databases, AJAX, JQuery, Redux, Express.js, Python, JEST, GitHub Version Control, Remote Collaboration

EXPERIENCE

Prime Digital Academy, Minneapolis, MN — Full Stack Software Engineering Student

JULY 2020 - PRESENT

- Learned to solve complex technical challenges using current and emerging technologies in a full time, immersive environment including: HTML, CSS, JavaScript, JQuery and React.JS and SQL Databases.
- Learned to design data systems, debug issues, research creative solutions, and implement versatile tools in a fast-paced, remote environment.
- Created group and solo projects mimicking real world standards for workflow, timelines, and collaboration requirements.

Dave & Busters- Edina, MN — Area Operations Manager

MAY 2019 - JULY 2020

- Fostered an environment focused on exceeding the expectations of our guests, while driving sales and engagement
- Instituted best practices to reduce waste and overages and drive profitability throughout all aspects of business
- Created and review schedules versus forecast to ensure profitability and protect guest experience
- Utilized in the moment coaching and quarterly reviews to help align direct reports to company standards and goals
- Executed staff onboarding and new hire training, as well as continuing education and development.

PROJECTS

TinkleTracker — Solo Project

Potty training tracker designed to help parents track their child's success in potty training, as well as engaging the child to see their own progress and successes. The users can create a profile and track each potty event with a description of what happened and whether it met the goal criteria, and can see their progress towards user defined goals.

Topgolf- Minneapolis, MN — Food and Beverage Manager

JANUARY 2017 - MAY 2019

- Executed \$22M+ annual sales, while ensuring the highest levels of guest satisfaction.
- Helped to lead new store openings and drive hiring, training, and onboarding of 450+ associates.
- Worked collaboratively to create plans of action for staffing, sales, and customer needs, in a dynamic environment.
- Created monthly sales forecasts, labor forecasts, and declining controllable budgets to maximize profitability and flow through in all cost centers.

TopGolf – Gilbert, AZ — Executive Chef

APRIL 2014 - JANUARY 2017

- Executed weekly inventory for all cost centers, and developed and executed action plans to address variances
- Utilized best practices and volume ordering to maximize revenue potential and reduce costs.
- Determined inefficiencies and worked to actively reduce controllable costs, including labor and food waste.

EDUCATION

Prime Digital Academy, Minneapolis, MN — Full Stack Software Engineering Certification

NOVEMBER 2020

20 week accelerated, immersive, and remote full stack engineering program. Areas of study include: HTML, CSS, React.js, Redux, Node.js, JavaScript, JQuery, and SQL databases.

All areas of study completed in a remote work environment.

Scottsdale Culinary Institute – Scottsdale Az — Associate of Occupational Studies Degree in Culinary Arts

MARCH 2010

Year long culinary training program, with focus on a solid fundamental base, exposure to world cuisine, and restaurant and hospitality management.
